

## Nursery week 1 Expressive Arts and Design

### 1. Make a telescope.

- Encourage your child to think about how they could make a telescope.
- Explain and show pictures of what a telescope is.
- Use a cardboard tube - decorate with paint, pens, collage. Make it unique!

Think about the following when using the telescope:

- What can you see with your telescope? - Look around your garden and house.
- What happens to things far away?
- Develop imagination and introduce different role play situations - I wonder what we could see if we are on a pirate ship?  
I wonder what we could see if we are on a boat at sea.

### 2. Make a book of your child's favourite songs and rhymes

- What songs do they like?
- Find pictures or get the children to draw the object to represent the song/rhyme.
- Sing together every day!

What can you see through your telescope?

Draw your pictures here:
