

IAL: to interpret data using a bar graph.

Last week we looked at different data from winter. Put the data on to the bar graph below then colour your bars in different colours.

Month	Hours of sunlight
December	8
January	8
February	10

Explain your findings. Use these questions to help you:

- Which month has the most amount of sunlight?
- Which month has the least amount of sunlight?
- Are any months the same?

December and January have the least amount of sunlight as both months have 8 hours. February has the most amount.

Now do the same again for the rainfall data. Use the table to complete the bar graph then colour your bars in different colours.

Month	Amount of rainfall (rounded)
December	90mm
January	85mm
February	150mm

Explain your findings. Use these questions to help you:

- Which month has the most amount of rainfall?
- Which month has the least amount of rainfall?
- Are any months the same?

January had the least amount of rainfall and February had the most amount of rainfall during winter.

IAL: to identify human and physical features.

This week, draw and label your own picture of a seaside. Your picture **must** include the human and physical features listed in the table below.

 human	 physical
pier boats lighthouse shops	hill sand sea beach cliffs

IAL: about local significant people.

Below is a fact file about William Webb Ellis, read the information and answer the questions on the following page.

William Webb Ellis was born on 24th November 1806 in Manchester. He was the son of James Ellis and Ann Webb and had an older brother called Thomas.

Williams dad died in 1812, leaving his mum to bring up him and his brother. She decided to move to Rugby, so that William and his brother could receive a good education at Rugby School.

William attended the school from 1816 to 1825 and was good at playing sports. In 1823, William went against the rules by catching the ball and running with it during a football match. William is credited with inventing the game of rugby.

The first written rules for the game of rugby were written by three Rugby School pupils and were printed in a small pocket-sized book in 1845. This is where many of the words came from, including 'try.' Since 1987, every four years, players compete for the Rugby World Cup trophy named in his honour.

William went to Oxford university in 1826 and then entered the Church after finishing.

William Webb Ellis passed away on 24th January 1872 and is buried in the South of France. His grave was rediscovered in 1958 and has since been renovated by the French Rugby Federation.

1. What were the names of William Webb Ellis's parents?

James Ellis and Ann Webb

2. Explain why William's mother moved them to Rugby.

She decided to move to Rugby so that William and his brother could receive a good education at Rugby School.

3. Which year did William catch the ball and run with it? Circle your answer.

1816

1825

1823

4. What sport was William playing when he caught the ball?

William was playing football.

5. Who wrote the first written rules for the game?

The first written rules were written by three Rugby school pupils.

6. Complete the sentence below.

Rugby players play for the Rugby World Cup trophy every

Four years.

7. Which university did William attend?

William went to Oxford university.

8. Where is William Webb Ellis buried? Tick your answer.

Rugby

Manchester

South of France ✓
